Beaded Jacobean flower design

Print off the design below and transfer onto your chosen fabric. To do this you can trace the design, use the prick and pounce method, a Hot-iron transfer pen or carbon transfer paper. Go over the paper design with a black pen first if you can't see it clearly.

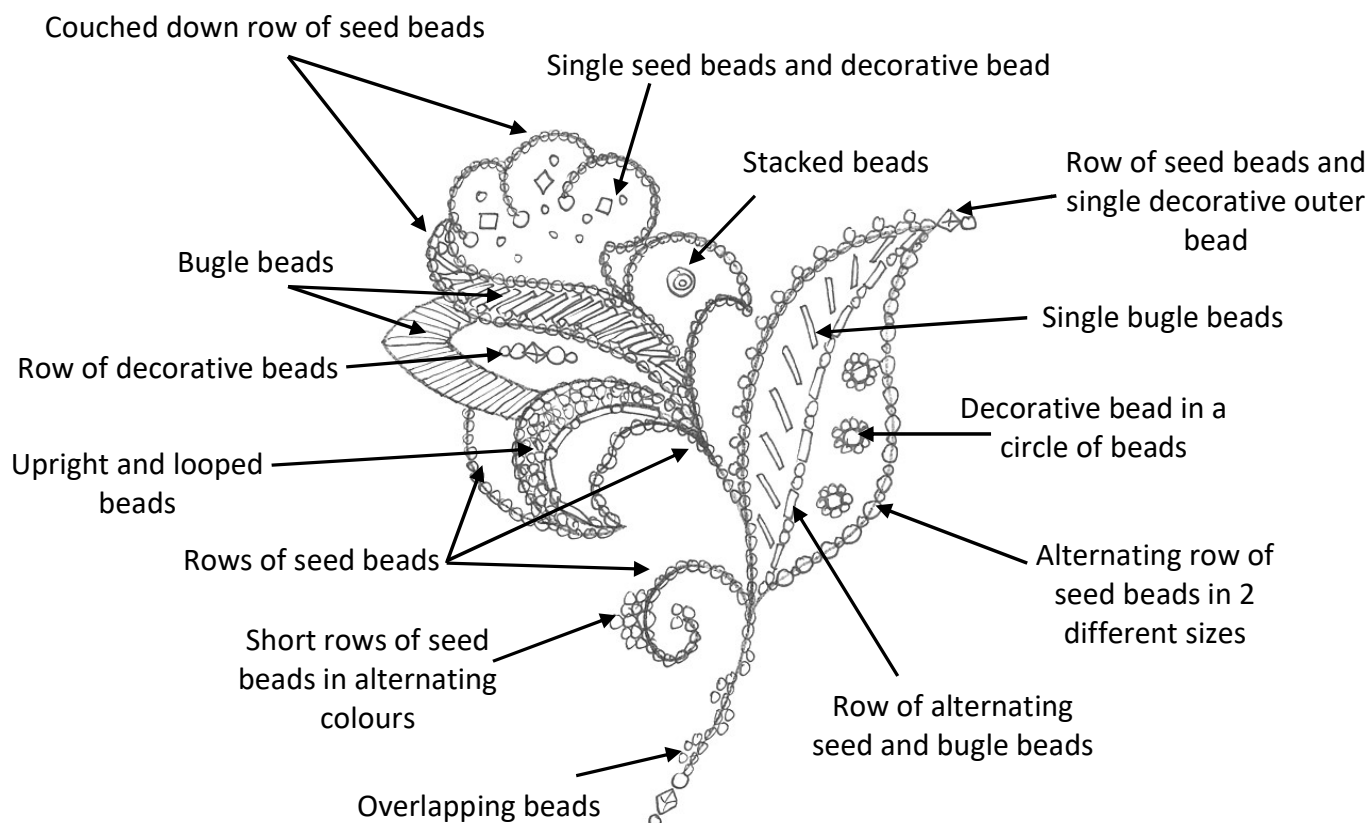

Place a backing fabric behind your embroidery fabric to give you a more stable ground to work on and frame both pieces together in your chosen embroidery hoop.

Design for transfer

Bead plan

I stitched my beads in the following way but it's easy to change the design to fit the beads you have. You could try drawing them on the transfer design as I have done below to decide where you would like them to go.

Materials you will need:

- Fabric to embroider your bead design on (any fabric will work well for this!)
- Cotton backing fabric
- Embroidery frame to fit fabric
- Selection of seed, bugle and decorative beads in colour scheme of your choice
- Strong sewing thread to match the colour of your fabric
- Fine embroidery needle (10 or 12) or a beading needle
- Beeswax, laying tool and velvet board are useful
- Embroidery scissors

Check out our video on how to stitch down beads and this project being worked; just search **Sarah Homfray Embroidery** on YouTube to find our channel and click on the red **SUBSCRIBE** button to bookmark our page.

Sarah is happy for you to use this design for your own personal use but not for any commercial use please without Sarah's permission (e.g. selling it on, teaching, selling the finished embroidery etc.)
